

## TUNAP 322

### Viscosity

A modern combination of active agents for all internal combustion engines to reducing oil consumption and wear. Fully effective with all mineral or synthetic engine oils. Meets the highest API and CCMC synthetic oil standards. Recommended for all four-stroke petrol and diesel engines.

#### Properties:

- Maintains oil viscosity until next oil change
- OMC<sup>2</sup> maintains and stabilises lubrication film even under extreme loading
- Optimum reduction in oil consumption
- Increases oil pressure in safe range
- Guarantees quiet and subdued engine running

#### Use:

- When oil consumption increased
- When oil viscosity is too low
- After every repair to prevent renewed oil consumption
- For long-distance journeys under difficult conditions, e.g. trailer operation, in hot climate zones

#### Application:

Sufficient for 4-5 litres of engine oil. Dosage up to a maximum of 20% of oil capacity. Reduce level of fresh oil accordingly.
