

TUNAP 344

Thermal protection concentrate

State-of-the-art synthetic cooling system substance in concentrated form.

Features

- △ Safeguards cooling system function
- △ Cleans whilst you're driving
- △ Converts rust and chalk to water soluble substances
- △ Protects the system against rust and lime scale.
- △ Neutralises acid coolant
- △ Disperses sludge and dirt
- △ Stops foam build-up that worsens thermal performance
- △ Complements used antifreeze

Capabilities

- △ Increased operating reliability
- △ Prevents overheating damage to engines
- △ Safeguards and keeps the thermal characteristics in the ideal temperature range
- △ Makes it possible for the TUNAP Indicator Lamp to quickly find precisely where there are leaks in the cooling system

Use

From 10.000 km up and/or every 20,000 km but not more than once annually. When renewing or adding to coolant. When replacing the radiator, thermostat, cylinder head gasket, water pump/s, etc.

Application

Just add to the coolant for permanent protection. Check the coolant level when doing so. Compatible with all antifreeze types. Recommended for sealed cooling systems too. Enough for 10 litre of coolant.
